Professional Summary

Frontend Engineer with 1.3 years of production experience building responsive, scalable, and high-performance web applications. Expert in React.js, JavaScript ES6+, and component-based architecture. Proven ability to translate designs into responsive, performant code with focus on web performance optimization and accessibility standards. Strong problem-solving abilities with experience in web performance optimization, code quality practices, and cross-functional collaboration.

Technical Skills

Frontend Technologies: React.js, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, Responsive Design, Mobile-first Development, Component Architecture, Performance Optimization, Accessibility Standards

State Management: Redux, Context API, Custom Hooks

JavaScript Tools: Webpack, Babel, npm, yarn

Testing & Quality: Jest, React Testing Library, Code Coverage Analysis

Version Control: Git, GitHub, GitLab, Pull Requests, Code Review, Merge Conflict Resolution, Branch Management

Development Practices: Code Reviews, Debugging, Web Performance Optimization, Lazy Loading, Code Splitting, Asynchronous JavaScript, Promises, Async/Await

Project Management: Jira, Agile, Scrum, Sprint Planning, Story Points, Issue Tracking, Confluence

Tools & Platforms: VS Code, Cursor, Windsurf, Chrome DevTools, Postman, Figma, npm/yarn

Professional Experience

Frontend Engineer | Mercanis (Client Project) Feb 2025 - Apr 2026 (1 Year)

Designed and maintained engaging frontend experiences for supplier management platform handling 500K+ daily active users Built responsive, scalable, and user-friendly web applications with focus on performance and usability Owned React components from design to production including order dashboard, inventory tracker, and analytics interface Translated designs into responsive, performant code achieving Lighthouse scores of 92/100 performance and 95/100 accessibility Developed responsive, high-performance user interfaces using React.js, JavaScript ES6+, HTML5, CSS3 Implemented advanced state management using Redux and Context API for complex data flows and multi-step forms Optimized web performance through code splitting, lazy loading, dynamic imports (React.lazy + Suspense), and component memoization Reduced initial load time from 4.2 seconds to 2.7 seconds (35% improvement) through systematic performance analysis and optimization Reduced bundle size from 4.2MB to 2.5MB (40% reduction) using Webpack bundle analysis, tree-shaking, and code splitting Implemented multi-layer caching strategy reducing database queries by 70% Established web performance optimization practices including lazy loading images, code splitting per route, and asset compression Built accessible user interfaces meeting WCAG standards with semantic HTML, ARIA labels, and keyboard navigation Implemented testing strategy with Jest and React Testing Library achieving 75% code coverage Maintained high code quality through peer reviews and best practices reducing production bugs by 40% Conducted 50+ code reviews with detailed feedback on code quality, performance, accessibility, and best practices Participated in agile ceremonies including standups, sprint planning, and retrospectives Collaborated with product managers, designers, and backend engineers on feature design and API integration Managed Git workflows including feature branches, pull requests, merge conflicts, and conventional commit messages

Education

Bachelor of Technology, Computer Science & Engineering Barkatullah
University, Bhopal M.P. | 2020-2024 | CGPA: 7.89

Additional Information

Languages: English, Hindi

Key Skills Demonstrated

Customer-centric approach: Focused on user experience and performance optimization Problem-solving: Reduced load time by 35%, bundle size by 40%, database queries by 70% Responsive design: Built interfaces working seamlessly on mobile, tablet, and desktop Accessibility: Implemented WCAG-compliant interfaces with semantic HTML and ARIA standards Performance optimization: Achieved 92/100 Lighthouse performance score through optimization techniques High code quality: 75% test coverage with Jest and React Testing Library, 40% bug reduction Component ownership: Owned components from design handoff to production deployment Collaboration: 50+ code reviews, cross-functional teamwork with designers and backend engineers
