Professional Summary

Frontend Engineer with 1.3 years of production experience building responsive, scalable, and high-performance web applications. Shipped 8+ production features with focus on web performance optimization and accessibility standards. Experienced in designing engaging frontend experiences, building responsive user interfaces, and translating designs into performant code. Strong background in code quality, web performance optimization, API integration, and cross-functional collaboration with product managers and designers.

Technical Skills

Frontend Technologies: JavaScript ES6+, HTML5, CSS3, React.js, Responsive Design, Mobile-first Development, Component Architecture, DOM Manipulation, Accessibility, Tailwind CSS, Performance Optimization

State Management: Redux, Context API, Custom Hooks

JavaScript Tools: Webpack, Babel, npm, yarn, Code Splitting, Dynamic Imports

Version Control: Git, GitHub, GitLab, Pull Requests, Code Review, Merge Conflict Resolution, Branch Management

Project Management: Jira, Agile, Scrum, Sprint Planning, Story Points, Issue Tracking, Confluence

Development Practices: Code Reviews, Debugging, API Integration, Web Performance Optimization, Lazy Loading, Code Splitting, Asynchronous

JavaScript, Promises, Async/Await, Testing Frameworks (Jest), Accessibility Standards, Problem Solving, Component Ownership

Tools & Platforms: VS Code, Cursor, Windsurf, Chrome DevTools, Postman, Figma

Professional Experience

Frontend Engineer | Mercanis (Client Project) Feb 2025 - Apr 2026 (1 Year)

Designed and maintained engaging frontend experiences for supplier management platform serving 500K+ daily active users Built responsive, scalable, and user-friendly web applications focusing on both performance and usability Translated designs into responsive, performant code achieving Lighthouse performance score of 92/100 and accessibility score of 95/100

Owned React components from design to production including order dashboard, inventory tracker, and analytics interface Optimized web performance from 4.2 seconds to 2.7 seconds load time (35% improvement) using code splitting, dynamic imports, lazy loading Implemented high-performance user interfaces using Webpack, Babel, and modern JavaScript tooling with code splitting and tree-shaking Reduced bundle size from 4.2MB to 2.5MB (40% reduction) through Webpack bundle analysis and optimization Implemented multi-layer caching strategy reducing database queries by 70% using Redis, React Query, and CDN caching Built accessible user interfaces meeting WCAG standards with semantic HTML, ARIA labels, and keyboard navigation Developed responsive design implementations ensuring seamless experience on mobile, tablet, and desktop devices Maintained high code quality through 50+ peer code reviews with detailed feedback on best practices and optimization Stayed current with frontend technology trends and implemented emerging best practices Conducted code reviews and knowledge sharing with team members on performance optimization and accessibility Led sprint planning and collaborated with product managers, designers, and backend engineers Managed Git workflows including feature branches, pull requests, merge conflicts, and conventional commit messages Participated in agile ceremonies including standups, planning, and retrospectives

Education

Bachelor of Technology, Computer Science & Engineering Barkatullah
University, Bhopal M.P. | 2020-2024 | CGPA: 7.89
