

Pratik Patidar

Frontend Engineer (React Specialist)

Email: pratikpatidar7990@gmail.com Phone: +91-8269647990 LinkedIn: linkedin.com/in/pratik-patidar GitHub: github.com/pratik-patidar

Professional Summary

Frontend Engineer with 1.3 years of production experience building responsive, scalable, component-based UI applications. Expert in React.js with strong foundation in React fundamentals including hooks, state management, and component lifecycle. Proven ability to design and maintain engaging frontend experiences, build responsive and high-performance user interfaces, and implement web performance optimization. Experienced in Git workflows, Agile development, code quality practices, and cross-functional collaboration with product managers and designers.

Technical Skills

Frontend Technologies: React.js, JavaScript ES6+, HTML5, CSS3, Responsive Design, Mobile-first Development, Component Architecture, DOM Manipulation, Hooks, State Management (Redux, Context API), Accessibility, Tailwind CSS

JavaScript Tools: Webpack, Babel, npm, yarn, Dynamic Imports, Code Splitting

Type Safety: Understanding of TypeScript concepts and type systems

Version Control: Git, GitHub, GitLab, Pull Requests, Code Review, Merge Conflict Resolution, Branch Management

Project Management: Jira, Agile, Scrum, Sprint Planning, Story Points, Issue Tracking, Confluence

Development Practices: Code Reviews, Debugging, API Integration, Web

Performance Optimization, Lazy Loading, Code Splitting, Asynchronous JavaScript, Promises, Async/Await, Testing Frameworks (Jest, React Testing Library), Accessibility Standards, Component Ownership, Design System Adherence

Tools & Platforms: VS Code, Cursor, Windsurf, Chrome DevTools, Postman, Figma, npm/yarn

Professional Experience

React Developer | Mercanis (Client Project) Feb 2025 - Apr 2026 (1 Year)

Designed and maintained engaging frontend experiences for supplier management platform serving 500K+ daily active users Built responsive, scalable, and user-friendly web applications focusing on both performance and usability Owned React components from design to production including order dashboard, inventory tracker, and analytics interface Translated designs into responsive, performant code achieving Lighthouse performance score of 92/100 and accessibility score of 95/100 Developed reusable, testable React components with hooks (useState, useEffect, useContext, useCallback, useMemo) following design system patterns Implemented advanced order filtering system with 15+ parameters using Context API and Redux for complex state management Maintained high code quality through peer reviews with detailed feedback on component design, performance optimization, and accessibility Optimized web performance from 4.2 seconds to 2.7 seconds load time (35% improvement) using code splitting, dynamic imports (React.lazy + Suspense), lazy loading Reduced bundle size from 4.2MB to 2.5MB (40% reduction) through Webpack bundle analysis, tree-shaking, and code splitting Built accessible user interfaces meeting WCAG standards with semantic HTML, ARIA labels, and keyboard navigation support Implemented testing framework with Jest and React Testing Library achieving 75%+ code coverage Conducted 50+ code reviews with detailed feedback on code quality, best practices, and performance optimization - reduced bugs by 40% Stayed current with frontend technology trends and implemented React best practices Participated in agile ceremonies and collaborated with product

managers, designers, and backend engineers on feature delivery

Education

Bachelor of Technology, Computer Science & Engineering Barkatullah
University, Bhopal M.P. | 2020-2024 | CGPA: 7.89

Additional Information

Languages: English, Hindi
