

Pratik Patidar

Frontend Engineer (React Specialist)

Email: pratikpatidar7990@gmail.com Phone: +91-8269647990 LinkedIn: linkedin.com/in/pratik-patidar GitHub: github.com/pratik-patidar

Professional Summary

React Developer with 1.3 years of production experience building scalable, component-based UI applications. Strong foundation in React fundamentals (hooks, state management, component lifecycle). Proven ability to work with modern JavaScript, collaborate across teams, and implement performance optimizations. Experienced in Git workflows, Agile development, and code quality practices.

Technical Skills

Frontend Technologies: React.js, JavaScript ES6+, HTML5, CSS3, Responsive Design, Mobile-first Development, Component Architecture, DOM Manipulation, Hooks, State Management (Redux, Context API), Accessibility (a11y)

Version Control: Git, GitHub, GitLab, Pull Requests, Code Review, Merge Conflict Resolution, Branch Management

Project Management: Jira, Agile, Scrum, Sprint Planning, Story Points, Issue Tracking, Confluence

Development Practices: Code Reviews, Debugging, API Integration, Performance Optimization, Lazy Loading, Asynchronous JavaScript, Promises, Async/Await, Testing Frameworks (Jest, React Testing Library), Accessibility Standards

Tools & Platforms: VS Code, Cursor, Windsurf, Chrome DevTools, Postman, Figma, npm/yarn

Professional Experience

React Developer | Mercanis (Client Project) Feb 2025 - Apr 2026 (1 Year)

Developed 8+ production features using React hooks, Context API, and component-based architecture for supplier management platform handling 500K+ daily users Built reusable, testable React components with hooks (useState, useEffect, useContext, useCallback, useMemo) following design patterns Implemented advanced order filtering system with 15+ parameters using Context API and memoized selectors (Reselect), preventing unnecessary re-renders Applied React.memo for expensive components, useMemo for complex calculations, and useCallback for stable event handlers Optimized performance from 4.2s → 2.7s load time (35% improvement) through code splitting, dynamic imports (React.lazy + Suspense), and lazy loading Achieved Lighthouse scores: Performance 92/100, Accessibility 95/100 using semantic HTML, ARIA labels, and keyboard navigation Built virtualized list component (react-window) reducing 1000+ row table render time from 2.3s to 340ms Conducted 50+ code reviews with detailed feedback on React patterns, performance, accessibility, and code quality - reduced production bugs by 40% Implemented testing suite with Jest + React Testing Library achieving 75%+ code coverage Collaborated with backend, QA, and product teams on feature design, API integration, and technical problem solving Managed feature branches, pull requests, merge conflicts, and committed to conventional commit standards

Education

Bachelor of Technology, Computer Science & Engineering Barkatullah University, Bhopal M.P. | 2020-2024 | CGPA: 7.89
